# Accessible Slides for LaTeX

James M. Murray, PhD

April 7, 2026

# Basic Slide

This is a basic slide.

You can create slides using the `slide` environment:

```
\begin{slide}{<Slide Title>}
...
\end{slide}
```

The content of each slide vertically aligned to the top of the slide. Use `\vspace*{<length>}` to adjust vertical position, if you wish.

Must be compiled with `lualatex`.

# Basic Slide with Lists

1. This is a numbered list item
2. This is another numbered list item
    - We can have bullet points too
    - And more bullets

- This is another bulleted list
- You can adjust the indentation of list items using the `leftmargin` option in the `itemize` environment, as needed.

# Subsections Make Section-Separator Slides

# Sections Mimic Regular Slides

- You can start a slide using `\section{}` instead of `\begin{slide}`
- This makes it behave well with Markdown

# Columns

You can make columns using the `columns` and `column` environments, much like Beamer.

- Make sure to join your columns with `\hfill` with no line spaces

# Columns with Blocks

**Look at Me!**

You can stand out using the `block` environment.

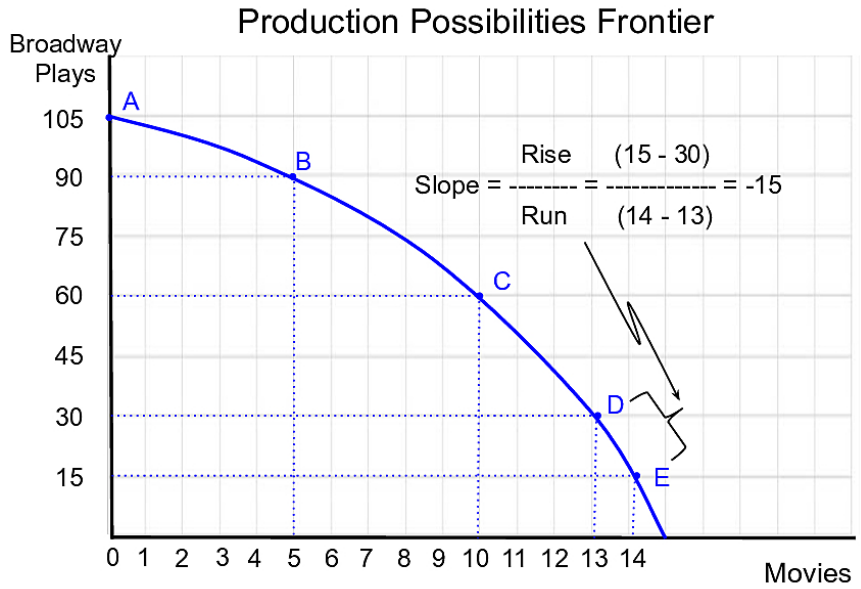

**Another Block**

You can have multiple blocks in a slide.

**Yet Another Block**

You can also have blocks that span the full slide width.

# Include Graphics with Alt Text

The `includegraphics` environment is redefined to require alternative text for accessibility.

# Decorative Graphics with `decographics`

Use `decographics` instead of `includegraphics` for purely decorative images. They do not require alt text and the images are ignored by assistive technologies.

# Math

The `accmath` environment provides display math with alt text for accessibility.

$$s = \sqrt{\frac{\sum_{i=1}^{n} x_i^2 - \frac{1}{n}\left(\sum_{i=1}^{n} x_i\right)^2}{n-1}}$$

The `acceqn` environment is a numbered equation with alt text:

$$e^{i\pi} + 1 = 0 \tag{1}$$

# Simple With Minimal Features

- This document class is not nearly as full-featured as Beamer.
- Many Beamer functions to sequentially reveal items are not accessible, and so are intentionally omitted.
- Other features like themes are omitted for simplicity and lack of time to work on it.
